School Name, Any City 2019-2020  
Percentage-87.6

### PROJECTS

**Neuzy-A Fullstack News Web App** [Live Link](#)

- Neuzy is built using MongoDB, Express, React, and Node.js to offer a fullstack solution for real-time news updates.
- MongoDB is used for storing user preferences and news categories, while Express and Node.js handle the server-side logic and API integration with external news services.
- The app allows users to explore news articles across multiple

**Calorie Calculator** [Live Link](#)

- This calorie calculator app is built using Next.js, taking advantage of server-side rendering for faster page loads and better SEO.
- The app computes not only total calorie requirements but also provides a detailed breakdown of macronutrients (proteins, carbs, and fats).
- It dynamically calculates daily caloric needs based on user-provided information, such as age, sex, height, weight, activity level, and fitness goals (e.g., maintaining, losing, or gaining weight).
